

A GREEN GROUP COMPANY

NewPower Fiber

Hydro-Oleophobic
100% Recycled Fibers

NewPower Fiber

**Hydro-oleophobic
100% recycled fibers**

Benefits

100% recycled fibers

that offers best-in-class sustainability

CO₂ emissions reduction

52,5% less CO₂ emissions vs fibers from virgin input

Gold Standard[®]

Used for specialized applications, this fiber has a unique property of oil/water repellency.

Key Features

- Hydro-oleophobic (oil/water repellency, possibility of FR treatment)
- CO2 emissions saving (52,5% less CO₂ vs virgin fiber)
- 100% made of recycled PET
- 100% recyclable
- 100% new resources
- Durability
- Lightweight properties

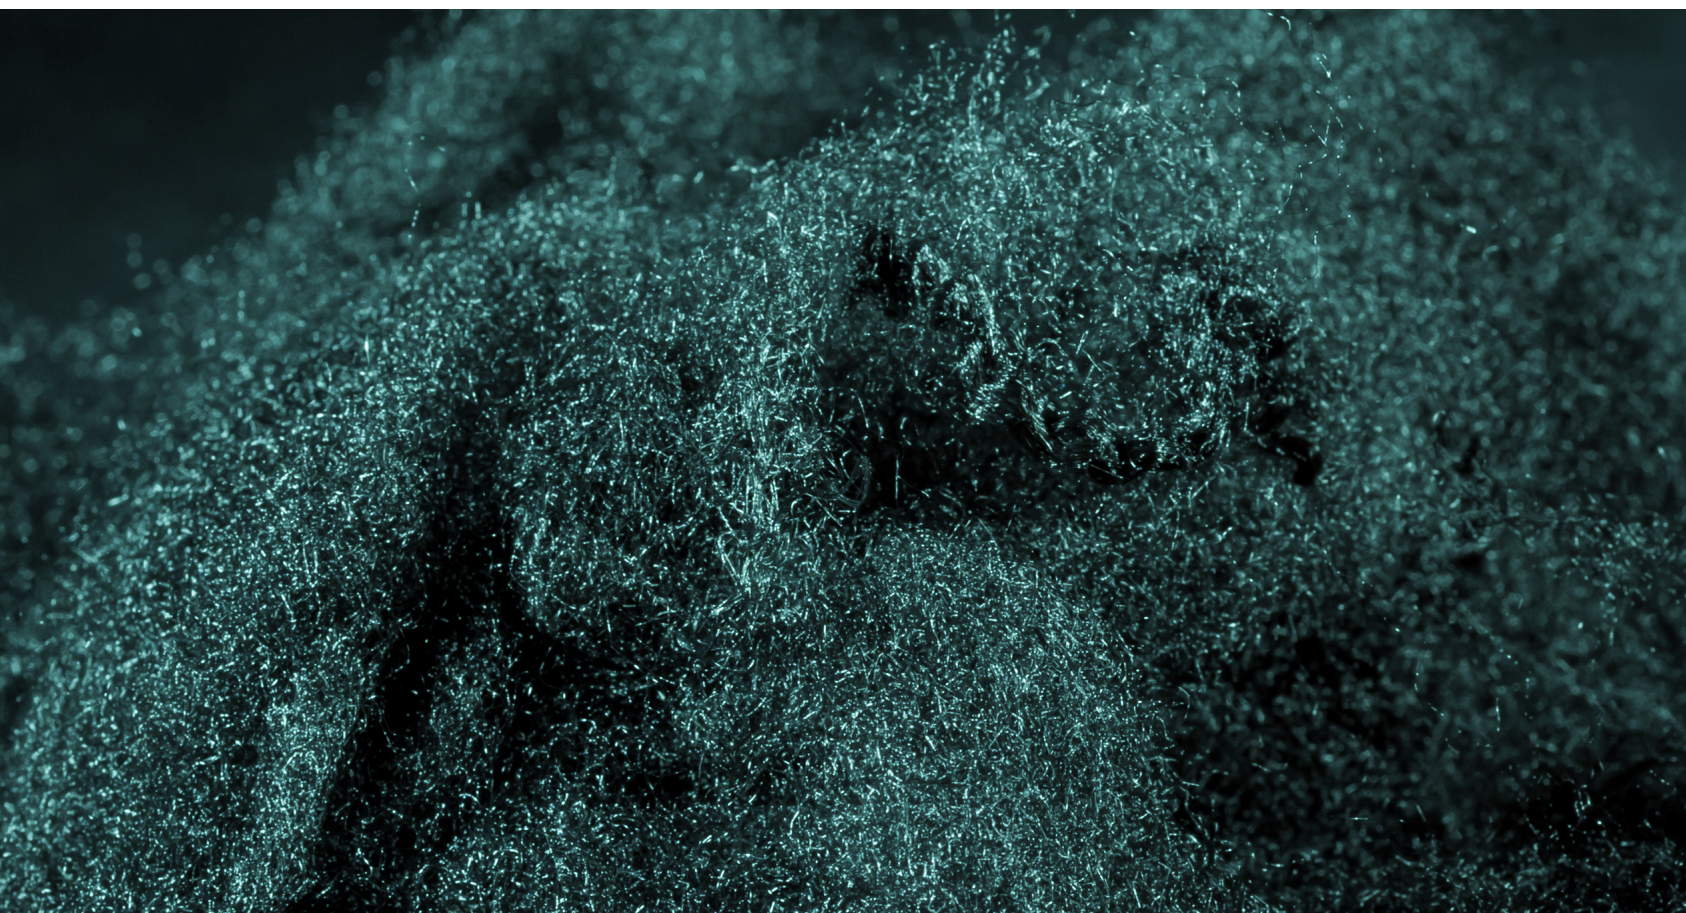

Specification	Range
Decitex	1.7 - 30 dtex
Cut Length	32 mm - 102 mm
Finish	Oil/water repellent
Cross Section	Round
Color	White, black, natural colors, mass dyed

The water repellency fiber is tested according to sinking behavior test.

The oil repellency is tested according to oil drop test or aatcc.118 test method (respectively EN ISO 14419).

Both water and oil repellency are permanent.

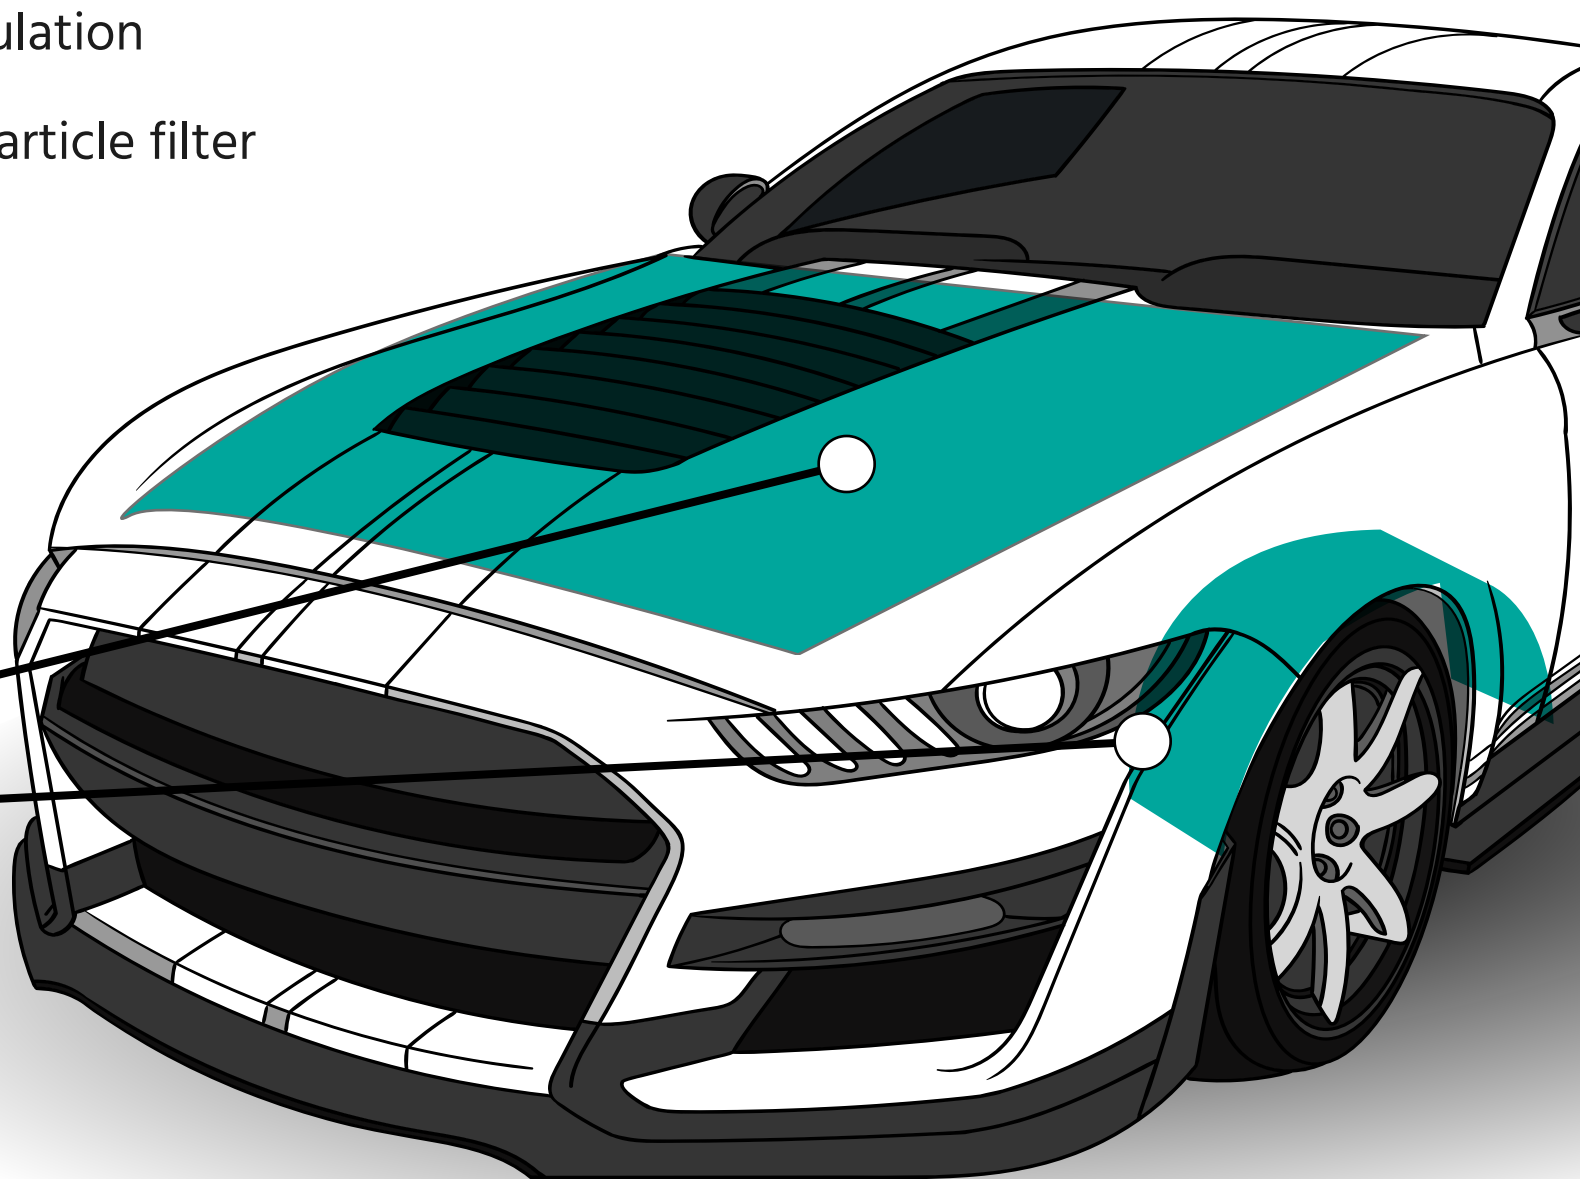

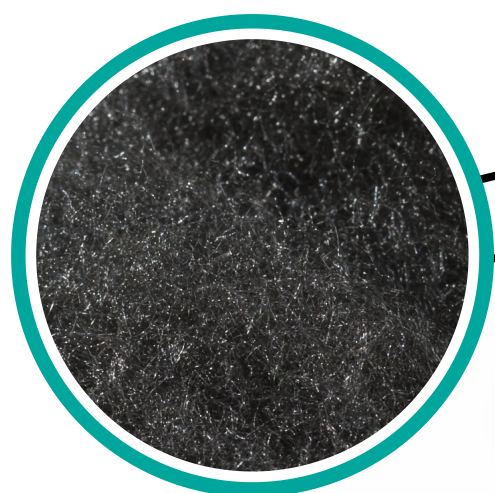

Applications

Automotive

Engine bay

- Engine compartment insulation
- Cabin air filter & Diesel particle filter
- Dash insulation
- Wheel arch liners
